POULTRY MANAGEMENT

Poultry Feeding by Stage: Layers, Broilers and Kienyeji

Which Sidai feed to use at each stage of production, from day-old chick to point of lay or slaughter.

Birds need different nutrients as they grow. Feeding the right ration at each stage supports frame development, immunity and production.

Layers

Stage	Sidai feed	What it does
Chicks	Chick & Duckling Mash	Proper frame development, faster growth, early immunity and early maturity
Growers	Growers Mash	Early maturity and early peaking 1–1.5 months from onset of lay
Laying birds	Layers Complete Meal	All nutrients for optimum laying, from point of lay to culling

Broilers

Stage	Sidai feed	What it does
Starting	Broiler Starter Crumbs	Strong bones and fast weight gain
Finishing	Broiler Finisher Pellets	Fast weight gain, minimal wastage and quality meat

Kienyeji and dual-purpose birds

Sidai Kienyeji Mash is a balanced feed for healthy and productive kienyeji and dual-purpose chicken.

Supplements at times of stress

- Chick Starter: vitamins and amino acids for the first days after hatching.
- Broiler Booster: for growth rate and heat or convalescent stress in broilers.
- Egg Booster: for layers and growers coming into lay, and at times of stress.
- Poultry Vitamins: a balanced source of vitamins and amino acids.

> *Vaccinate your flock against Newcastle disease, Gumboro, Marek's disease and fowl typhoid. Ask a Sidai vet for a schedule.*

This guide gives general information. Always read and follow product labels, and ask a qualified Sidai vet or agronomist for advice on your own animals or crops. Online version: sidai.com/resources/guides/poultry-feeding-by-stage
