COLLARD

SOUTHERN GEORGIA

A tropical collard well adapted to heat as well as rain
Ultra Early maturity of 30-40 days for first picking
Thrives in fertile soil with a **spacing** of roughly 60cm x 45cm
High prolific collard short internodes
Long harvesting period >1 year.
Excellent keeping quality; 3-5 days after harvesting depending on the temperatures of the day, it is still keeping fresh.
Intermediate resistance to black rot (Xcc).
Highly resistance to stem rots.
Seed rate: 3.5kg/acre

ONION

RED CREOLE

Early Medium Variety
Spacing of 30cm x 8cm
Excellent deep red bulb with single concentric center
Good disease package
Yield potential : 55 - 70 tons perc hactare
High uniform red bulb. Very strong pungent.
Excellent curing ability.
Seed rate: 1.25kg / acre

PEPPER

CARLIFORNIA WONDER

Open field variety. 80 to 90 days to maturity.
Spacing of 60cm x 30cm
Compact plant with very good vigor. Large leaves protecting fruits from sun burn. Very good uniformity and production continuity
Color: from green to glossy red. Fruit size: (11x10)mm. Fruit weight; 250-280 grams averagely. High resistant: Tm:0-2; PepMoV; PVY:0, 1-2; TM:0-2
Intermediate resistance : Cucurbit Mosaic Virus (CMV)
Seed rate : 100gm / acre

SPINACH

FORD HOOK GIANT

A shiny deep green leafy vegetable that is highly nutritious and has a long harvesting period.
Spacing of 45cm x 30cm. Matures in 60 - 65 days.
Yield potential : 4T / Acre
Deep Greens processing.
Suitable for fresh consumption and market
Seed rate : 1.5kg / acre

MANAGU

GIANT NIGHT SHADE

Highly productive, with estimates of 7–8 kg per plant.
Spacing of 30cm x 15cm
Thrives well in a fertile soil.
It is versatile, easy to grow, and adaptable to various soil types.
Leaves can be harvested within 35-45 days, often harvested for 3 months.

CARROTS

NANTES

Attractive long, coreless and straight carrot.
Spacing of 45cm x 8cm
Has a natural sheen and a deep orange colour and sweet taste.
Highly nutritious. 7 inches.
Matures in 90-120 days.
Colour : Deep Orange
Fresh Market Growers

SPIDERPLANT

SAGRET

Typically grows 30–120 cm tall with smooth or sparsely hairy stems.
Spacing of 45cm x 25cm
Prefers warm seasons (above 15°C) and full sunlight, not growing well in the shade. Requires regular weeding, especially in the first six weeks, and is sensitive to drought.
Culinary: Eaten as a cooked green vegetable or stew.
Preservation: Leaves can be blanched and dried in the shade for storage, lasting up to six months.

AMARANTHUS

DUBIOUS

An erect annual herb that grows up to 80–120 cm (can reach 150-200 cm).
Spacing of 45cm x 15cm
Thrives in hot, tropical, and subtropical climates, growing well at day temperatures over 25°C. Fast-growing (emergence in 3-5 days), with the first harvest possible 3-4 weeks after sowing.
Often "ratooned" (cut, leaving 10-15 cm for regrowth) to allow multiple harvests every 2–3 weeks.

BEETROOT

DETROIT DARK RED

Has round to flat smooth bulbs medium in size.
Spacing of 30cm x 10cm
Has internal red colour and very light zoning in the fruit. Higher sugar content of 5-7% making it ideal for fresh juice.
Matures in 80 to 90 days.
Yield : 12 -23 MT/Acre
Suitable for home garden and fresh market.

BUTTERNUT

SQUASH

Light tan coloured, elongated bell shaped fruit.
Spacing of 100cm x 75cm
Orange flesh, excellent vigour in the field..
Matures in 75 – 90 days.
Yield : 14 – 21T/Acre
Colour : Light tan
Suitable Market Growers, Home Growers.

CUCUMBER

ASHLEY

An excellent source of nutrients and usually consumed in salads.
Spacing of 150cm x 75cm
Requires staking for good production.
Matures in 45-60 days.
Harvest: 2.5 T/Acre
Colour : Dark green
Use: Fresh Market Growers, consumption and processing.

CORRIANDER

DAIMA

Hardy multi cut variety highly aromatic herb whose leaves are harvested and used fresh or seeds left to ripen and used as a dried spice.
Spacing of 30cm x 10cm
Fast maturity (4-8 weeks) from sowing.
Yield : 12-15T/Acre
Colour : Deep Red
Use : Fresh market and processing.

CABBAGE

COPENHAGEN

Days to maturity : 70 - 75 Days.
Spacing of 60cm x 45cm
Nice green-blueish color attractive for fresh markets.
Maturity is very uniform with a high first cut percentage of not less than 90%
Good field holding capacity after maturity.
Good compact head 3.5 - 6 Kgs
Very uniform round shape heads.
Intermediate Resistance to black rot (Xcc)
Seed rate : 100gms/acre
